

Watch AI Build an Executive Portfolio

Follow along as you watch – and keep this afterward. Today is a demo: you watch and jump into the chat, not build your own yet. And know this up front – **Mike builds from a real resume from someone in the room.**

THIS ONE'S INTERACTIVE – GET IN THE CHAT

Mike will ask questions along the way and ask you to reply in the chat – usually just a **1** or a **YES**. Do it. It keeps you in the conversation, and your answers shape where the session goes.

The run of show · ~30 minutes

- | | |
|--------|---|
| ~5 min | Welcome + why this matters (jump into the chat) |
| ~7 min | The live build – a real resume from the room becomes a portfolio |
| ~5 min | Two quick edits – Mike makes one, then the person whose page it is makes one |
| ~4 min | Going live – deploy to a real URL |
| ~9 min | What the course gives you + Q&A – ask anything |

The one idea to take away

The skill isn't knowing AI. The skill is knowing how to ask. A good request has three parts:

- 1 Requirements** – *what* you want, as clearly as you can say it.
- 2 Context** – the supporting info that helps the AI get it right (your resume, your Super Power Statement, your stories).
- 3 Intent** – *why* you want it, and what it should accomplish.

That third one is the secret. Before building, Mike asks what the page should *do* – land a job, open doors for networking, or bring in fractional/consulting work – and the *same resume* becomes a different page depending on the answer.

What you're watching for

- ◆ **The first build** appears from a single, well-framed request, tailored to that person's goal. He describes the *outcome*, not the steps.
- ◆ **Iteration is a conversation.** Watch the two edits – Mike makes one, then hands the wheel to the person whose page it is and *they* direct a change, live.
- ◆ **Single source of truth.** Your resume is the master; the page is built *from* it. No more updating the same thing in five places like LinkedIn makes you.
- ◆ **It becomes real.** The page goes from "inside the app" to a live web address anyone can open – the difference between a demo and a deliverable.

Want to try it yourself later? Here's the starter

Sign up free at **claude.ai**, open a chat, and paste this in (fill in the brackets):

I'd like you to build me a one-page personal landing page as an artifact.

About me:

- Name: [YOUR NAME]
- Current role: [CURRENT TITLE]

Intent: this page is primarily for [JOB SEARCH / NETWORKING / FRACTIONAL & CONSULTING].
Optimize the emphasis, tone, and calls-to-action for that goal.

My Super Power Statement (from my GHN Career Academy):
[PASTE YOUR SPS]

My resume summary and top roles:
[PASTE SUMMARY AND TOP 2-3 ROLES]

Career stories I use in interviews (2-3 with measurable results):
- [Story 1 - what happened + the measurable result]
- [Story 2 - what happened + the measurable result]

Include: a hero with my name and a tagline, a short bio, my stories as cards with clear results, and a contact section. Make it polished and modern - think executive portfolio. Show it as a web artifact I can preview.

Pro tip: Hold **Shift + Enter** to add line breaks while you build a long prompt, so you don't send it before it's ready.

WHAT YOU BUILD IN 4 SESSIONS

01

SESSION 1 • JUL 15

Your first build

Bring your resume, Super Power Statement, and career stories. Leave with a live shareable page.

02

SESSION 2 • JUL 22

Make it yours

Choose a design. Sharpen your copy. Add depth until it reads like you.

03

SESSION 3 • JUL 29

Out of the chat

Move into real project files saved to your own computer.

04

SESSION 4 • AUG 5

Go live

Deploy to a real URL you own. Optional: connect a custom domain.

YOUR NEXT MOVE

You won't just learn to use AI. You'll walk out able to speak to it, prove it, and apply it — with a live site as your evidence.

When someone asks how you use AI, you'll hand them a link to something you built yourself.
